SUMMER IS HERE!!

With all the dry muggy weather we will probably experience this Summer you may see patchy areas and wild grasses growing... Below are some common problems you will probably see in your lawn due to all the humidity...Please read them over and if any questions still need answering please contact us

LAWN DISEASES!!

SUMMER PATCH--Occurs during hot days (above 85 degrees) and warm evenings (above 65 degrees) with rainy conditions on poorly drained soils. It appears as irregular patches and rings.

MUSHROOMS-- Mushrooms aren't treatable and are just another type of fungus that occurs when we have muggy temperatures and humid nights. Hard to believe but getting mushrooms in areas means that your soil is pretty healthy in that area.

FIELD GRASSES: In the Paspalum family, many field grasses appear around the same time as crabgrass. Field grasses are commonly mistaken as crabgrass. Field grasses are not controlled by using broadleaf herbicides and will require specialty herbicides to address. These issues can be reduced overtime.

NUTGRASS is a light green grass that grows rapidly. You can cut your grass and that night it will already grow 1/2 to 1 inch. This type of grass likes wet conditions where you have tough drain areas. We can spray this if needed just let us know. Otherwise we let it fizzle which is usually in a few weeks.

**touch up areas no charge-entire property certain charges apply

DISCOUNTED SEEDING FOR FALL!!

Get ahead and plan for AERATION AND SEEDING this FALL. This will help reduce compaction of the soil from all the dry weather. We are offering SUBSTANTIAL DISCOUNTS so people can patch up any damage!! We like to do Aeration and Seeding in Mid-Sept. to Early-October. Schedules fill up quickly so please make sure you contact us so we can work in your schedule.

GRUBS GRUBS GRUBS!!

GRUBS are out in some areas and can be a major headache if left untreated. For those of you who **DO NOT** have this scheduled please call to discuss. We will leave you detailed notes with every application so please read carefully.

GIVE US YOUR FEEDBACK:

Please visit us on langslawncare.com and scroll half way down the page for all the different feedback sites. We value your feedback since we live by "Word of Mouth". Please also view website for random giveaways we will be running throughout the season!!

DRIVEWAY SEALCOATING:

Let us get your driveway a Black Mat Finish. Brush Applied!!! We are filling our Summer/Fall Schedules quickly. If interested in having your driveway Sealed Please contact us as soon as possible. Call **610-647-6002**

THE SPOTTED LANTERNFLY

is the latest invasive pest to impact area landscapes. First found in lower Berks County in September of 2014, It has begun to spread rapidly throughout our service area.

While the **Adult Stage** is more visible, drawing more attention, it is the **Nymph Stage** which will be doing the damage to residential landscape plants. Our control program **Addresses Both Stages** so that your landscape can continue to thrive and you can continue to **enjoy your outdoor investment.**

TREE / SHRUB

We also offer **TREE/SHRUB TREATMENTS** for other summer pests such as **MITES, BAGWORMS AND JAPANESE BEETLES.** If you are not already a Tree/Shrub customer contact us to see how we can help your ornamental landscape!
